

DIRT Bag™

Repair System

Dirt, debris, sand, extreme temperatures, and water spray can make on-site repairs difficult or impossible. DIRT Bag is your solution for in-field and flight line repairs. DIRT Bag also isolates repair-generated debris to protect equipment and personnel in repair facilities.

CRG
INDUSTRIES
the power to innovate

Benefits

- Reduces maintenance costs
- Resists wind and environmental contamination
- Keeps repair debris in
- Offers structural support
- Waterproof
- Minimizes need to transport damaged components to a repair facility

Features

- Self-adhesive seal
- Conformable to complex shapes
- Collapsible
- Advanced hand ports that seal tightly
- ECU compatible
- Hose and cord access
- Custom hand port/ hose port placement

Industries

- Aerospace
- Marine
- Electrical
- Electronics
- Automotive

DIRT Bag provides portable convenience for high-quality repairs in austere environments and controlled facilities.

DIRT Bag fits securely over the damaged area, adheres to the surface, and provides a structurally supported covering that conforms to the shapes and angles of the repair site.

Applications

- Confines harmful debris associated with composite grinding and grit blasting
- Prevents contamination of repair
- Protects bonded repairs using sol-gel procedure
- Provides temperature and humidity controlled environment when coupled with an environmental control unit (ECU)
- Acts as a non-contact curing oven for paints and coatings
